

July 2026 Judging

Cattleyas took the spotlight **again** this month! And we had a couple of interesting genera this month for judging. Mormolyca is genus that can be found in Florida, the Caribbean, Mexico, Central and South America. This particular orchid is synonymous with Maxillaria lineolata. Thank you, Judy, for bringing in this interesting species. Ludochilus is hybrid created by crossing the genus Anoectochilus with Ludisia. These are genera we don't see every day. Thanks, everyone, for bringing your wonderful plants!

Judging Results

Vandaceous Group: Entries: 3

1 st	Rhynchostylis retusa	Natalie Chutkan
1 st	Vanda Phopraya 'White Fairy'	Alan Smith
2 nd	Rhynchostylis retusa	Judy Congdon
